SWA has hydraulic presses with a clamping force of up to 500 tonnes. We use our presses to adjust moulds and to produce tryouts and prototypes.

Punching tools cut outer, inner contours and holes on previously pressed, injection moulded or foamed components. We specialise in stamping the highest quality three-dimensional products such as complete instrument panels, door panels and headliners as well as acoustic and insulation parts.

SWA develops and manufactures tools, machines and systems for the production of vehicle interior, exterior and acoustic insulation parts, especially for customers in the automotive industry and its suppliers.

SWA produces tools, machines and systems for the production of interior, exterior and acoustic insulation parts for vehicles. These products from SWA are available for use at all major automotive production sites and are therefore the ideal complement to the Kiefel
